## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

37 CFR 1.499 states "If the examiner finds that a national stage application lacks unity of invention under § 1.475, the examiner may in an Office action require the applicant in the response to that action to elect the invention to which the claims shall be restricted."

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-20, drawn to a method of preparing bone cement and a bone cement mixture obtained by the process.

Group II, claims 21-25, drawn to an apparatus including two containers.

2. Note: The claims of Group II are improperly dependent because they fail to comply with 37 CFR 1.75(c) and 35 U.S.C. 112, forth paragraph. 35 U.S.C. 112, forth paragraph states "a claim in dependent form shall contain a reference to a claim previously set forth and then specify a further limitation of the subject matter claimed." The claims of group II fail to require the method steps of the parent claim and instead refer to the parent claim in a preamble statement of intended use ("for performing the method according to claim 1"). As explained in MPEP 608.01(n)(II), "Any claim which is in dependent form but which is so worded that it, in fact is not, as, for example, it does not include every limitation of the claim on which it depends, will be required to be

*canceled* as not being a proper dependent claim; and cancellation of any further claim depending on such a dependent claim will be similarly required" (emphasis in original).

3. Note: the claims of Group II include several references to intended contents of the claimed apparatus. "Expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim." *Ex parte Thibault*, 164 USPQ 666,667 (Bd. App. 1969).
4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: While claims of the two groups include many identical word, the only shared features are a container having and inlet and out and another container. Because the shared features are prior art, they are by definition not "special technical features". US Patent No. 4,973,168 to Chan is cited as evidence that these feature are known and do not define a contribution over the prior art as required by PCT Rule 13.2.
5. A telephone call was made to David E. Spaw on 21 November 2002 to request an oral election to the above restriction requirement, but a written action was requested by Mr. Spaw.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
